- I. **PURPOSE:** The purpose of this Request for Proposal (RFP) is to solicit sealed proposals from qualified firms to establish a contract through competitive negotiation for the purchase and implementation of a GIS-centric, Cloud-based, Software as a Service (SaaS) version Enterprise Land Management (ELM) software system.
- II. **MINORITY BUSINESS PROGRAM:** As part of the City of Charlottesville’s Minority Business Program, the City of Charlottesville encourages the participation of small, women, minority, veteran and micro-owned businesses (SWaM-O) in the City’s procurement transactions. In order to support and build up the capacity of SWaM-O businesses, City Council and staff have taken steps to push forward policy changes and initiatives to help reduce barriers to doing business with the City. To find out more about the current City of Charlottesville initiatives and programs please visit the Minority Business Program website at <https://www.charlottesville.gov/718/Minority-Business-Program>.
- III. **BACKGROUND:** The City realizes that part of the modernization effort of becoming a “Smart City” includes strategically aligning People, Process and Technology in order to manage work more efficiently and effectively. By-products of IT Modernization include real-time access to performance data for informed decision-making, strategic allocation of City resources for service readiness, and the provision of increasingly high levels of customer service to the citizens of Charlottesville. The City has spent the last year preparing for this effort through the “Business Process Mapping Services” Project, which has focused on: 1) the analysis of the current environment [across the functional areas of NDS], 2) creation of Business Process Maps (BPM) including the utilization of newer, more sophisticated, integrated enterprise software systems, and 3) defining requirements (functional, technical, integration, etc.) for the selection of the new ELM software system. Through the selection and implementation of this integrated enterprise software system (across the same platform), the City will continue positioning itself to become a “Smart City” by operating in a best-of-breed technology environment.

NDS is responsible for overseeing the permitting, infrastructure, and land management duties for the City. NDS is comprised of the following functional divisions (10):

- | | | |
|----------------|-------------|------------------------|
| 1. Building | 5. Housing | 8. Traffic Engineering |
| 2. Engineering | 6. Planning | 9. Transportation |
| 3. Front Desk | 7. Property | 10. Zoning |
| 4. Historic | Maintenance | |

NDS is presently utilizing “Adept” as its commercial and residential permitting system. This “on-premise” system has been in place since August 2008 and has undergone minimal updates since its initial implementation. Under the current electronic permitting system, NDS currently lacks automated workflows, which cause bottlenecks in the comprehensive Development Process, as multi-disciplinary plan reviews across functional divisions are inundated with hard copy paper. Furthermore, the lack of citizen self-service capabilities through the current system limits the local development community’s ability to engage remotely with the City by applying for permits electronically, tracking plan review progress, and paying associated fees online. As a result, NDS is looking to replace their current permitting system with a new GIS-centric, cloud-based ELM system to manage the lifecycle of a building, which includes workflow automation for building efficiency in process execution, mobility for the workforce to increase effectiveness in the field, and an interactive portal for electronic plan review, project management, and engagement with the local development community.

- IV. **STATEMENT OF NEEDS:** The proposal shall include software, technical labor, data conversion, training, hardware (as needed), and ongoing support and maintenance that meet the City’s business needs as described in this RFP. The City will consider all cloud-based deployment options, which include Software as a Service (SaaS). The City intends to integrate the requested system, including all modules, with other current core systems as well as any future systems. Specifically, the ELM system will be utilized by Neighborhood Development Services (NDS) for managing the lifecycle of a building, including permits, inspections, new construction, occupancy, renovations, and demolition.

The City expects NDS to achieve substantial gains in productivity, efficiency, accuracy, mobility and capacity to make data-driven decisions through the implementation of the ELM software system. In addition, through the implementation of the public access portal, NDS expects to increase the level of service delivery with the local development community. The ELM software system must integrate with key enterprise technologies, including the City’s Enterprise Resource Planning (ERP) system (SAP), Geographic Information System (ESRI), among others. Multiple data collection points, both fixed and mobile, are envisioned to promote City employee/user ease, and encourage City engagement, both within the development community and citizens.

A. SOFTWARE SYSTEM

NDS believes that the procurement and implementation of an ELM software system will result in improved levels of service and responsiveness to the development community, including residents and businesses of Charlottesville. General requirements of the ELM software system include, but are not limited to, the following:

- Streamline business processes through automation across the lifecycle of a building, including permits, inspections, new construction, occupancy, renovations, and demolition
- Integrate with ESRI ArcGIS data layers for management of lifecycle of a building
- Create project dashboards (assignments, due dates, activity)
- Provide mobile system access for field staff to complete inspections
- Provide land management performance reporting and query tools
- Expand customer engagement capabilities with NDS through the usage of citizen access web portal

The comprehensive Requirements Traceability Matrix (RTM) details the various types of requirements identified for the ELM software system. The nine excel spreadsheets that make up the RTM for ELM are as follows:

- APPENDIX A – RTM General Requirements – for general system use
- APPENDIX B – RTM Public-Service Portal Requirements – for accessing the Public-Service Portal
- APPENDIX C – RTM Permit Requirements – for issuing permits using the system
- APPENDIX D – RTM Inspection Requirements – for conducting inspections using the system
- APPENDIX E – RTM Geographic Information System (GIS) Requirements – for using GIS integration with system
- APPENDIX F – RTM Payment Requirements – for processing payments
- APPENDIX G – RTM Mobility Requirements – for system accessing using a mobile device
- APPENDIX H – RTM Reporting Requirements – for performance reporting using the system
- APPENDIX I – RTM Interface Requirements – for system integration with other business systems

B. IMPLEMENTATION SERVICES

In addition to the procurement of the Cloud-based, Software as a Service (SaaS) version of the ELM software system, the City is looking for the contractor to provide services that will ensure a successful implementation. These services should include:

- Project Management Workflow Configuration
- Business Process Review
- Data Conversion Services
- Software System Integration
- End User Training
- Software System Documentation
- Software Maintenance and Support

The City has spent the last year completing business process analysis to create BPM through the “Business Process Mapping Services” Project, across the functional areas of NDS. The City recognizes that redesigned internal business processes may differ from the final design of the new ELM system. The City is willing to make modifications to key business processes where appropriate in order to gain the full advantages of the functionality and workflow automation offered by the new ELM software system. There are thirteen separate folders containing BPM and are named as follows:

- Building
- Engineering
- Fire
- Front Desk

- Historic
- Housing
- Permitting
- Planning
- Property Maintenance
- Site Plan
- Traffic Engineering
- Transportation
- Zoning

V. PROPOSAL PREPARATION AND SUBMISSION INSTRUCTIONS:

A. GENERAL INSTRUCTIONS:

1. RFP Response: In order to be considered for selection, Offerors must submit a complete response to this RFP (“Proposal”).
 - a. One (1) printed version original marked “*Original*” and five (5) copies of each Proposal shall be transmitted to the City, along with two (2) electronic copies of the proposal on CD. **The City will accept flash drives or USB sticks.** The proposal should be formatted either in Microsoft Word or PDF.
 - b. In addition, should the proposal contain proprietary information, submit one (1) redacted printed version with proprietary portions removed or blacked out marked “*Redacted Copy*” along with an electronic copy on CD either in Microsoft Word or PDF format of same. **The City will accept flash drives or USB sticks.**

These items must be submitted to the City as a complete sealed proposal. No other distribution of the proposal shall be made by the Offeror.

Proposals must be submitted by the date and time stated in the solicitation. Proposals will be date and time stamped upon receipt and retained unopened in a secure location until proposal opening. No consideration will be given to date of postmark or error in delivery to incorrect address. It is the responsibility of the Offeror to ensure timely and correct delivery of proposal.

2. Proposal Preparation:
 - a. Proposals shall be signed by an authorized representative of the offeror.
 - b. Each Proposal must be and remain valid for a period of at least one hundred eighty (180) days from the date set by this RFP for receipt of proposals.
 - c. All information requested or required by this RFP must be submitted. Failure to submit all information requested may affect the overall rating of the Offeror’s proposal
 - d. Proposals should be prepared simply, providing a clear, straightforward, concise description of the Offeror’s qualifications and suitability to provide the required services, and of the Offeror’s capabilities, in all respects, to perform fully the requirements of this RFP, and the Offeror’s integrity and reliability that will assure good faith performance of the Project requirements.
 - d. Proposals should be organized in the order in which the requirements are presented in the RFP. All pages of the proposal should be numbered. Each paragraph in the proposal should reference the paragraph number of the corresponding section of the RFP. It is also helpful to cite the paragraph number, sub-paragraph, and repeat the text of the requirement as it appears in the RFP. If a response covers more than one page, the paragraph number and sub-paragraph number should be repeated at the top of the next page. The proposal should contain a table of contents, which cross-references the RFP requirements. Information which the Offeror desires to present that does not fall within any of the

requirements of the RFP should be inserted at an appropriate place or be attached at the end of the proposal and designated as additional material. Proposals not organized in this manner may receive a lower score if evaluators are unable to find where the proposal specifically addresses the RFP requirements.

- f. As used in this RFP, the terms "must", "will" and "shall" identify mandatory requirements. Items labeled as "should" or "may" are highly desirable, and are preferred. Depending on the overall quality and completeness of a Proposal, inability of an Offeror to satisfy a "must", "will" or "shall" requirement may not automatically remove that Offeror from consideration; however, it may affect the overall rating of the Offerors' proposal.
 - g. Each copy of the Proposal should be bound or contained in a single volume where practical. All documentation submitted with the proposal should be contained in that single volume.
 - h. All proceedings, records, contracts and other records relating to this procurement transaction shall be open to public inspection in accordance with the *Virginia Freedom of Information Act*. Trade secrets or proprietary information submitted by an offeror shall not be subject to public disclosure under the *Virginia Freedom of Information Act*; however, the offeror must invoke the protections of § 2.2-4342F of the Code of Virginia, in writing, either before or at the time the data or other material is submitted. The written notice must specifically identify the data or materials to be protected and state the reasons why protection is necessary. The proprietary or trade secret material submitted must be identified by some distinct method such as highlighting or underlining and must indicate only the specific words, figures, or paragraphs that constitute trade secret or proprietary information. The classification of an entire proposal document, line item prices, and/or total proposal prices as proprietary or trade secrets is not acceptable. Offerors, upon request, shall be afforded the opportunity to inspect proposal records within a reasonable time after the evaluation and negotiations of proposals are completed, but prior to award, except in the event that the City decides not to accept any of the proposals and to reopen the contract. Otherwise, proposal records shall be open to public inspection only after award of a contract by the City.
 - i. All costs of proposal preparation and presentation shall be borne by each offeror. The City is not liable for any cost incurred by the offeror prior to issuance of a contract.
3. Oral Presentation / System Demonstration: Offerors who submit a proposal in response to this RFP may be required to give an oral presentation of their proposal to the City. A demonstration of their ELM software system may also be required. This provides an opportunity for the offeror to clarify or elaborate on the proposal and/or show a demonstration of the functionality of their software system. This is a fact finding and explanation session only and does not include negotiation. The City will schedule the time and location of these presentations. Oral presentations are an option of the City and may or may not be conducted.

Contractor may not substitute other staff or individual(s) without the prior, express written consent of the City. - e. **Unreasonable Charges.** Under certain emergency procurements and for most time and material purchases, final job costs cannot be accurately determined at the time orders are placed. In such cases, contractors should be put on notice that final payment in full is contingent on a determination of reasonableness with respect to all invoiced charges. Charges which appear to be unreasonable will be researched and challenged, and that portion of the invoice held in abeyance until a settlement can be reached. Upon determining that invoiced charges are not reasonable, the City shall promptly notify the contractor, in writing, as to those charges which it considers unreasonable and the basis for the determination. A contractor may not institute legal action unless a settlement cannot be reached within thirty (30) days of notification. The date of mailing of any payment by U. S. Mail is deemed to be payment to the addressee. These provisions apply to each sub-tier contractor performing under the primary contract. Health and Safety shall be a prime concern of the Contractor at all times. The Contractor shall be solely responsible for and have control over the means, methods, techniques, sequences and procedures for coordinating and performing construction, including project site safety and safety precautions and programs. The City’s contract administrator or their designee will have final authority regarding the appropriateness of the Contractor’s plan and execution and will have the final decision regarding admission of Contractors to the work site.

Some City owned or maintained facilities will be temporarily and/or conditionally opened and available for site investigations and/or construction work. Based on recommendations set forth by the Centers for Disease Control (CDC), the Virginia Department of Health and the Thomas Jefferson Health District, all City staff, contractors and contractors must adhere to strict social distancing recommendations, wearing of face coverings, enhanced sanitizing procedures, and apply relevant workplace guidance and regulations from state and federal authorities including:

- CDC: <https://www.cdc.gov/coronavirus/2019-ncov/community/guidance-business-response.html>
- OSHA: <https://www.osha.gov/SLTC/covid-19/controlprevention.html#health>
- Virginia Department of Labor and Industry: <https://www.doli.virginia.gov/vosh-programs/coronavirus-covid-19-resources/>

NOTE: The Virginia Department of Labor and Industry (“DOLI”) passed its Emergency Temporary Standard for Infectious Disease Prevention related to COVID-19 on July 15: <https://www.doli.virginia.gov/wp-content/uploads/2020/07/COVID-19-Emergency-Temporary-Standard-FOR-PUBLIC-DISTRIBUTION-FINAL-7.17.2020.pdf> It includes hazard assessment, communication and training requirements, depending on the types of tasks employees perform at work. The standard became effective on July 27, 2020.

Authority & Definition

The basis of this policy is rooted in the guidance from the Centers for Disease Control (CDC) and the Virginia Department of Health (VDH) regarding transmission of COVID-19. “*Community facilities*” (e.g., schools, daycares centers, businesses) comprise most non- healthcare settings that are visited by the general public outside of a household.

Procedure:

I. Responsibilities of all persons who enter City owned or maintained facilities:

a. Practice and enforce social distancing:

- i. Increase distance between shared work spaces. When physically greeting others, avoid physical contact. (i.e. do not fist bump, shake hands, hugs, etc.)
- ii. Limit work groups to 10 individuals or less and keep at least 6 feet apart. When possible, avoid more than 1 person in the elevator at a time.
- iii. Practice and enforce social distancing with colleagues and visitors by keeping space between yourself and others. Actively monitor and ask colleagues to stay 6 feet apart if feasible.
- iv. Convert most in-person meetings to virtual meetings. Ensure in-person groups are no larger than 10 people and appropriate physical space of at least 6 feet is maintained between each individual.
- v. Increase physical workspace between employees. This includes modifying existing seating

arrangements in workspaces, break areas and conference rooms as necessary.

b. Practice preventive measures:

- i. Individuals who are sick should remain at home.
- ii. If a worker shows symptoms or indicates they may have been exposed, they must be sent home. Anyone with a temperature above 100.0 degrees Fahrenheit will not be permitted to work on City property, and if a worker is found to have developed a temperature above 100.0 degrees while working, they must leave the work site.
- iii. Hand-shaking and physical contact are prohibited. Practice cough etiquette. Cough or sneeze into your elbow or tissues. If you cough into tissues throw them in the trash **and** wash your hands immediately.
- iv. Request visitors who enter the building wash their hands or use alcohol- based hand rubs containing at least 60% alcohol upon arrival and during their visit.
- v. Wash hands frequently with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer which should be rubbed on hands until dry, about 20 seconds.
- vi. Face coverings are required to be worn by everyone in shared spaces where social distancing measures cannot be maintained.

Note: Cloth face coverings are NOT surgical masks or respirators and are not appropriate substitutes for them in workplaces where masks or respirators are recommended or required.

- vii. Refrain from talking over documents, equipment, or food items that will be distributed to others.
- viii. For certain occupied facilities, special traffic routes and restroom facilities may, or may not, be available for Staff, Contractor staff and subcontractors. Such restrictions will be detailed in solicitations for work but may be modified as conditions change. Contractors shall review and train, daily, with its employees and subcontractors regarding which foot traffic routes, restroom facilities, and areas of the facility are restricted for the Contractor staff and subcontractors.
- ix. Clean all frequently touched surfaces routinely (i.e. daily).
- x. Maintain an open line of communication with the workforce and keep them informed with the latest news and/or changes which may directly affect them.

c. Specific Responsibilities of the Outside Contractor(s) when entering City owned or maintained facilities:

In addition to the above practices, it is the responsibility of the Outside Contractor to also:

- i. Comply with existing OSHA standards (<https://www.osha.gov/SLTC/covid-19/standards.html>) as these standards apply to protecting workers from the novel coronavirus, COVID-19. The contractor is responsible to remain compliant with all applicable OSHA requirements.
- ii. The Contractor is required to implement a health screening protocol that includes both temperature monitoring and health screening questions to determine if workers are experiencing COVID-19 symptoms or (potentially) exposed to someone with COVID-19 symptoms. Results will be documented and maintained and can be audited by the City's representative at any time.
- iii. Promote frequent and thorough hand washing, including by providing workers, customers, and worksite visitors with a place to wash their hands. If soap and running water are not immediately available, provide alcohol- based hand rubs containing at least 60% alcohol.
- iv. Provide reminders to their staff of the importance of regular handwashing and take all precautionary measures to ensure that workers have hand washing facilities, or an alternative to prevent further spread of the virus.
- v. Ensure hand sanitizer is fully stocked in all portable restrooms.
- vi. Provide to workers, customers, and worksite visitors cloth face covers which cover the mouth and nose.
- vii. Maintain enhanced housekeeping practices, including routine cleaning and disinfecting of surfaces, equipment, and other elements of the work environment.
- viii. Ensure that all safety related information (including signage) is relayed to the workers in their native

- language as to ensure that they will understand the message.
- ix. Submit the contractor's plan for responding to a COVID case in terms of worker removal from jobsite, notification, workspace cleaning, and return to work. This plan must include immediate notification of the City's contract administrator of a worker who is or has been working on City property who is suspected or who has tested positive for COVID 19. NOTE: If a COVID case involving City employees occurs in the proximity of the contractor's jobsite, the contractor will be notified.
 - x. Upon completion of work, the entire work area shall be thoroughly cleaned and disinfected with a disinfectant approved by the Environmental Protection Agency.

Thank you in advance for demonstrating community care by implementing the above prevention measures.
